N270 NITROGEN GENERATOR

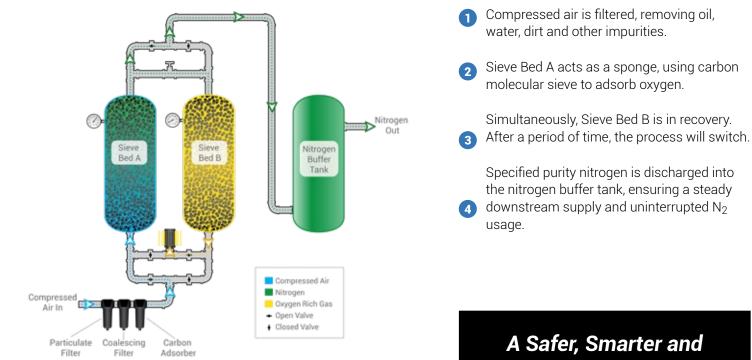

The LABTEK N,70 produce high-purity nitrogen for laboratory applications such as Liquid Chromatography - Mass Spectrometry, Glove Boxes, and Evaporators. Our units use state-of-the-art, dual-bed pressure swing adsorption (PSA) technology to produce high-purity, LCMS grade nitrogen without taking up valuable lab workspace. Additional filtration ensures that your generator and analytical equipment are free from contamination and particulates.

HOW OUR TECHNOLOGY WORKS

LABTEK nitrogen generation technology safely separates the readily available nitrogen from the air we breathe using Carbon Molecular Sieve (CMS). Molecules smaller than nitrogen are adsorbed into the CMS, allowing the larger nitrogen molecules to pass through into a storage tank for later process use. Our generators create quality nitrogen, ready for immediate use by any application.
